

join the #1 food innovation network

United across disciplines, towards a transparent, resilient & resource-efficient food system

By joining forces throughout the value chain, we work to improve the engagement between consumers, authorities and stakeholders in the EU agro-food community. Together we aim to create a sustainable and consumer-centered system that is competitive on a global scale.

Industry-led, powered by academia

We work with top-level food companies and academia, representing the whole food system, and talk about real food issues to make a real difference. As an independent network we strive to make the food system stronger by supporting the application of state-of-the-art research to solve industrial and societal challenges.

Valuable collaborations

Climate change, loss of primary resources and - for instance - changing dietary habits, are not only challenges that face the food system, but the whole society. We're excited to tackle these challenges with ready-to-go projects and promising startups. By embracing and sharing our innovations and knowledge we are motivated to secure the economic and environmental sustainability of our food system.

Rob Hamer - President, FoodNexus

Three interconnected societal challenges

Transforming the foodsystem

Current food system

- linear & disconnected
- low consumer interaction & intransparent
- unsustainable
- inefficient
- vulnerable
- not competitive & ineffective

Future food system

- integrated & connected
- consumer-centered & transparent
- sustainable
- resource-efficient
- climate-resilient
- competitive & influential

INFLUENCE

Influence the food system together with top-level decision makers.

Connect with company leaders and top academics from all over Europe during exclusive events. We link regional, national and European initiatives to efficiently drive innovation and shape the food agenda. Together we strive to make the food system more transparent, resilient and efficient on an environmental and economic level, while integrating local food systems.

INNOVATE

Accelerate innovation with influencers throughout the value chain.

Our lean governance allows you to engage directly with members in our network and database. To ensure the success rate of common projects, we analyse and suggest matches between partners, issues and calls. As a member you can enter consortia from the very start, shape and direct projects to ensure a better fit to your needs or get started right away and collaborate on ready-to-go projects. Or you can scout startups during the European FoodNexus Startup Challenge.

TALENT

Develop your talent with tailor-made education programmes for food professionals.

Tap into the combined potential of our academic partners and benefit from the expertise of top agro-food universities and research institutions. Play a central role in the custom development of business-driven education modules for your team and organisation to make sure new science is applied.

Membership

Enjoy access to various benefits as a valued member. Some privileges include:

- Exclusive access to the annual visioning summit and other events attended by high-level business and academic decision makers.
- Direct individual access to the FoodNexus member and project database.
- Free access to the finals of the European FoodNexus Startup Challenge.
- Lower risk and costs of pre-competitive research by collaborating with like-minded partners.
- Increased chances of project application success with latest insights into new programmes, legislation and sustainable development.
- Knowledge sharing throughout the system by joining FoodNexus Continuing Education modules.
